ENGLISH ROADS ADOPT AMERICAN METHODS.

The latest annual report of the sec retary of the British Analyamate Society of Railway Servants, show the results of adopting in that cour try American methods in using larger locomotives, running heavier trains and otherwise. This was begun in 1900, when there was an increase of 190,000,000 tons of traffic in comparison with 1896, and an increase 22,000,000 in freight train miles. After another four years, in 1904 the increased tons of traffic were nearly 25,000,000 as compared with 1900, but include route to Torrance one of the the mileage instead of increasing had arentest successes that has been acdecreased about 25,000,000 miles. The complished in this portion of the coun-Northwestern Railway for illustration by in years. We came here from had withdrawn 142 engines from serv- Torrance a few days ago in six bours ice, but owing to the larger type of and had we traveled by rail we would locomotives now used the company's still be on the journey. The auto tractive power had early doubled, route, I believe, is a money-maker, The secretary's reopri covers various too, right now, and will increase in other railway subjects, but its general argument is that the adoption of mod- ually it will cause some one to built ern methods, though increasing the a railroad to Torrance, and that is efficiency and working capacity of the when it will have accomplished its rallways, is seriously displacing in greatest good. When the people gen-dividual labor, crally learn what a great saving in dividual labor.
